

Master of Science in Accounting

Preparing You For Today's Challenging Accounting and Business Environment

It takes time, money and energy to obtain a graduate degree. So you want to be sure any degree you earn will enable you to reach your educational and career goals. If those goals include preparing yourself to take advantage of the full range of opportunities in the accounting profession and related business fields, then our Master of Science in Accounting (MSA) Program may be ideal for you.

INNOVATIVE

The MSA Program accommodates a wide range of students, from accounting graduates looking for a fifth year of accounting studies to liberal arts graduates seeking enhanced career prospects in the accounting and business worlds. Whatever your undergraduate background, the Program's unique cross-disciplinary approach will strengthen the technical, analytical and interpersonal skills highly prized by employers. And it will give you the tools to be a leader in an increasingly complex and competitive business environment. In addition, as a MSA Program graduate:

- e You satisfy the 150-hour requirement for the Certified Public Accountant (CPA) examination in effect in most states
- e You're sought after by prestigious firms and enjoy a variety of career opportunities including those in professional services, private industry and the government
- e You're taught by talented faculty that do significant research, publish regularly in academic and professional journals and are committed to helping students achieve their career goals
- e You're part of one of the country's best universities. For the third straight year, *U.S. News and World Report* ranked many Boston College graduate programs among the top 50

FLEXIBLE

We offer a unique Summer/Summer program for former undergraduate accounting majors who have full-time jobs and want to minimize time away from work. For students with no prior accounting background, we offer a yearlong, full-time program. There's substantial flexibility in class selection, too. You can complement your accounting courses with courses in other areas—finance and marketing, for example—that interest you most.

COLLABORATIVE

The MSA Program attracts a diverse group of top-notch business and liberal arts graduates. They share a go-getter attitude, a commitment to their communities and a strong interest in accounting and business studies. Each brings his and her unique background into the classroom, where they're encouraged to share experiences in a highly collaborative setting.

To learn more about our MSA Program and find out if it's right for you, visit www.bc.edu/msa.

A WISE INVESTMENT IN YOUR FUTURE
